

## CRYPTOMINING RESOURCES:

Here are some great links for websites and apps to help prevent, as well as dealing with cryptomining attacks. Please spend some time becoming familiar with them, and bookmarking them for future reference.

- <https://brave.com/>
  - The latest version of the privacy-focused Brave browser will block cryptomining scripts from running in your browser by default
- <https://www.mozilla.org/en-US/firefox/new/>
  - The new version 67 of Firefox browser will block cryptomining scripts from running in the browser
- <https://noscript.net/>
  - The free NoScript Firefox extension provides extra protection for Firefox, and other mozilla-based browsers. It will allow **JavaScript, Java, Flash and other plugins** to be executed only by **trusted web sites of your choice** (e.g. your online bank). As such, it will block any cryptomining scripts if you accidentally visit a site that has them running, and have scripts blocked by default
