

## SMISHING RESOURCES:

Here are some great links for websites when dealing with suspicious or malicious SMS texts on your smartphone. Please spend some time becoming familiar with them, and bookmarking them for future reference.

- <https://www.malwarebytes.com/mobile/>
  - MalwareBytes has a great mobile app that flags Smishing and Vishing, as well as malicious websites and malware
- <https://www.taphive.com/smsshield/>
  - SMS Shield uses Artificial Intelligence to filter out malicious SMS texts from your phone
- <http://www.verosms.com/>
  - VeroSMS provides accurate spam protection using crowdsourced data based on keywords which other users like you provide
- <https://www.taphive.com/smsshield/>
  - SMS Shield is an offline Machine Learning-based spam filter for iPhone. We trained it on what spam SMS looks like by showing it tens of thousands of spam SMSes beforehand. SMS Shield then learns and, to a high degree of confidence, can identify spam even if it hasn't seen it before
