IoT RESOURCES:

Here are a few links for resources you can use to better protect your home network. Please spend some time becoming familiar with them, and bookmarking them for future reference.

- https://use.opendns.com/
  - For your home systems, Cisco offers you free DNS servers, called OpenDNS, which have many filters for blocking pornographic and malicious websites

- https://www.grc.com/x/ne.dll?bh0bkyd2
  - The famous and free Shields Up Scanner, which checks how exposed your home computer network may be to the Internet

- https://me.censys.io
  - A very cool resource for all of you, and especially for those that are now forced to work form home. "Censys, the internet scanning search engine, has a new online home Wi-Fi network scanner, which quickly identifies any risks on your home network — like leaky ports or exposed devices." Run the scan, its free!
